

AVAILABLE SERIES

The complete b.o.p. back data based on BPM6 methodology are available from the first quarter of 2008 onwards. Less detailed back data were produced for the purpose of the Macroeconomic Imbalance Procedure (MIP); the major aggregates are available from 2003 onwards. The goods and services aggregates are available from 2000 onwards.

Until reference period 2012, BPM6 back data were derived from existing BPM5 components, complemented with additional detail when available, without using the BPM6 compilation system. Since reference period 2013, the surveys were adapted and detailed input data are directly derived from raw survey data.
